CIS 432/532 Introduction to Computer Networks
Fall 2002

Program #1 Survey

1. Identification
   Undergraduate
   Graduated
   Print clearly.
   Name

2. Program Status
   Check the boxes below to indicate which functions your program performs properly.

   Functionality
   - Program compiles
   - Basic functionality: running your client with your server
   - Time command prints current time
   - Diff command prints difference since client last asked for time, in hours, minutes, and seconds using format specified in assignment
   - Quit command causes client to quit
   - Server handles multiple, simultaneous clients and tracks time and diff correctly for each
   - Interoperability: running your code with solution code
   - All parts of protocol, running your client with solution server
   - All parts of protocol, running solution client with your server

3. Comments
   If your program doesn’t work properly, please describe in more detail what is wrong. Use the back if you need more space. Also, if you used some special implementation then describe it here.
