CIS 110 Homework 1

Due Wednesday June 24, before class

1. Read your textbook Chapter 1, 2 and 4.

2. Please use your favorite search engine, and find out the most powerful supercomputers in the world. Write a paragraph about them, and list the top 3 you can find.

3. We talk about client-server model in class. There is another architecture called Peer-to-Peer (P2P). Please write a paragraph about P2P and give a diagram about it.

4. Under your 110 directory at your uoregon.edu account, create your default webpage (index.html). There should be at least one hyperlink, one image, and one paragraph of text. You should place the image into a subdirectory under your 110 directory (hint: 110/images/img1.jpg (or img1.gif).

For Problem 1 and 2, email me your files. For Part 3, email me the URL of the webpage you create.
