PYTHON INSTALLATION STEPS FOR WINDOWS

1. Go to python.org
2. Select Downloads from menu on left hand side of the screen
3. Click on ‘Python 3.3.0 Windows x86 MSI Installer’
4. Double click on python-3.3.0.msi file after it has been downloaded onto your computer.
5. Click Run -> Next -> Next -> Next -> Finish which completes installation.
6. Click on Windows Startup button and type idle in the search bar.
7. Select IDLE (Python GUI) from the menu which opens IDLE.
8. Now you can use IDLE to type in commands into your Python Shell.
