Assignment:

1) Download Proj4A.tar
   a. It contains 3 programs: p1.c, p2.c, and p3.c
   b. Each program contains memory errors
      i. P1 has 3
      ii. P2 has 5
      iii. P3 has 1

2) Debug the memory errors in p1, p2, and p3
   a. Debugging can happen with gdb, with printf, or with valgrind
      i. NOTE: GTFs will lecture on valgrind at discussion

3) Write down the memory errors for each program
   a. Ideally this will be about one sentence per memory error, and your total writeup will be less than one page

4) Bring your writeup to class on Wednesday April 22nd.
   a. We will grade it as a group then
