This document shows all of the ideas generated by students for Project 2, in alphabetical order by student's last name. You may use any of the ideas presented here, but be sure to provide some attribution in your SRS, even if just to say something like "The project was inspired by <student's full name>'s May 7 2020 Project 2 idea." (Unfortunately, because it made it difficult for other students to provide correct attribution for any ideas, Project 2 Idea documents that were submitted with no name could not be included in this document.)
