Write a document describing your group’s progress on your project. Indicate whether or not your milestone goals were met, and whether or not you think that you are on track to accomplish your project goals by the end of the term. Discuss any particular challenges that you’ve overcome or that are blocking your progress.

Include a link to your project’s version-control page and the names of all team members in your document.

Have one of your team members submit a document to Canvas for credit.

Upload your document to Canvas (see Assignments section for submission link).
